中心介紹 ABOUT CIE

澳大創新創業中心是澳門大學科技成果轉化的一個孵化平台，獲批為國家級眾創空間，致力幫助澳大師生、校友和教職員工將其具有商業潛力的創意理念轉化為創業實踐，並形成創新型人才培養機制，促進澳門產業發展，為粵港澳大灣區的青年開闢廣闊的成長和事業發展空間。

The Centre for Innovation and Entrepreneurship (CIE) at UM is an incubation platform that has been included in China's national framework of co-working spaces. Established for the transformation of the university's technological achievements, the CIE is dedicated to assisting UM students, alumni, faculty, and staff in translating the commercial potential of their innovative ideas into entrepreneurial practices. It aims to establish a mechanism for nurturing innovative talents, promoting industrial development in Macao, and fostering extensive opportunities for the growth and professional advancement of youth in the Greater Bay Area.

主任的話 MESSAGE FROM THE HEAD

歡迎蒞臨創新創業中心！

創新是推動社會進步和經濟繁榮的核心動力，而創業則是實現個人夢想和社會價值的重要途徑。我們希望通過提供大學資源和社會各界的專業支援，激發和培育大學創新創業的火花，為創業者們鋪平通往成功的道路。

在創新創業中心，我們堅守以下核心價值觀：一是開放合作，我們鼓勵多元交流和協作創新，促進不同行業和領域之間的碰撞與融合；二是追求卓越，我們崇尚創新精神和不斷超越的決心，致力於打破常規和突破自我；三是社會責任，我們秉持可持續發展的理念，關注澳門發展的需要，促進經濟多元化發展。

大學應該要發揮一個更大的角色，一是在創科方面，從科研成果的創新、轉化，變成能夠貢獻社會，能夠應對我們社會面臨挑戰的一些新產品、新技術或者服務。二是我們要培養更多的創科方面的人才，為澳門以及整個大灣區和國家的科技發展做貢獻。

我們的使命是培育創新能力，孵化創業項目，助力創業者取得成功。為了實現這一使命，我們將提供全方位的支援和服務，支援澳門大學學生、教職員及校友把具有商業潛力的創新構想轉化成創業專案，讓其「走進社會」以產生經濟效應，把人、技術和產業相互貫通。

我們將構建澳門大學的科技成果轉化與創新創業生態系統，並形成創新型人才培養機制，促進澳門產業發展，為粵港澳大灣區的青年開闢廣闊的成長和事業發展空間，冀達至「為青年計、為澳門劃、為灣區書」。

創新創業中心將作為孵化前期支持創業起步的「跑道」，協助澳大師生實現其創業夢。創新創業中心熱切期待為各位師生提供創業創新的諮詢以及專業意見等支援服務。

梁麗嫻 教授
創新創業中心主任

Welcome to the Centre for Innovation and Entrepreneurship!

Innovation makes society better while startup companies can turn personal dreams and social ideals into reality. We aim to spark innovation and entrepreneurship within our university by providing resources and professional support from all sectors of the community. This will help entrepreneurs to succeed.

Our value:

1. Openness and cooperation. We encourage diverse exchanges, collaborative innovation, and promote integration between different industries.
2. Pursuit of excellence. We admire the innovative spirit and the determination to go beyond conventions and strive to break down barriers.
3. Social responsibility. We value sustainable development and address the needs of Macau's development as well as economic diversification.

University plays an important role in the stimulation of science and technology development. We encourage translation of scientific research into new products, technologies or services contributing to our society. We also nurture talents with skills and potential to promote advanced science and technology development not only in Macau but also the Greater Bay Area and our country.

Our mission is to develop an innovative atmosphere, support start-up projects and assist entrepreneurs in achieving success. To meet this goal, we will offer comprehensive services to students, staff, and alumni of the University of Macau to help them transform their creative ideas into entrepreneurial projects. Additionally, we will encourage the connection between people, technology, and industry.

We will create an environment for transforming scientific and technological progress and promoting innovation and entrepreneurship. We will also establish a training mechanism for creative talents to boost the growth of Macao's industries and create opportunities for young people in the Guangdong-Hong Kong-Macau Bay Area to pursue their careers. Our ultimate objective is to achieve the goal of planning for the youth, planning for Macau, and contributing to the development of the Greater Bay Area.

Here, we will function as a pre-incubation platform to aid our students and faculty members in realizing their aspirations to become entrepreneurs. Here, we are eager to offer assistance and guidance on entrepreneurship and innovation, through services such as consulting and professional advice to you.

Prof. Elaine Lai Han LEUNG

Head of Centre for Innovation and Entrepreneurship

澳門大學創新創業中心 (國家級眾創空間)

Centre for Innovation and Entrepreneurship of the University of Macau
(National Co-Working Space)

介紹 Introduction

澳門大學創新創業中心（國家級眾創空間）獲澳門科學技術發展基金資助，設立澳大「大健康+」加速器。聚焦保健、醫藥及醫療器械三大領域，旨在加速本校優質科研成果轉化落地。通過系統培育、概念驗證及市場檢驗，推動項目跨越從研究到商業化的「死亡之谷」，獲取商業投資機會與培養複合型創業人才，更致力於構建完善科技成果轉化生態系統，助力澳門「1+4」適度多元發展策略落地，服務其長期繁榮與穩定。

The "Health+" Accelerator, established by the Centre for Innovation and Entrepreneurship (CIE) of the University of Macau with funding from the Macao Science and Technology Development Fund, serves as a dedicated program for research translation. Focusing on three key areas—health and wellness products, pharmaceuticals, and medical devices—the Accelerator aims to expedite the commercialization of the University's high-quality research outputs.

By providing a structured pathway that integrates systematic training, proof-of-concept, and market validation, the program supports project teams in crossing the "Valley of Death" from research to commercialization. In addition, the Accelerator is committed to fostering access to investment, cultivating interdisciplinary entrepreneurial talents, and building and strengthening a technology-transfer ecosystem, thereby contributing to Macao's "1+4" appropriate diversification strategy and its long-term prosperity.

願景 Vision

構建科技成果轉化與創新創業生態系統，形成創新型人才培養機制，促進澳門產業發展。

Building an **Innovation and Entrepreneurship Ecosystem for Research Translation**, establishing new talent development mechanisms, and advancing Macao's industry development.

使命 Mission

打造兼具科研洞察與商業化能力的**複合型創業人才**。

Cultivating **innovation-oriented entrepreneurial talents** with both research competence and commercialization capability.

推動項目跨越從實驗室研究到商業化的「死亡之谷」。
crossing the **"Valley of Death"** from laboratory research to commercialization.

- 醫工結合賦能技術
Med-tech integration and
enabling technologies
- 可穿戴與遠程監控設備
Wearable and remote-
monitoring devices
- 3D 類器官
3D organoids

全週期「技術 + 商業」雙軌赋能加速模式
"Technology + Business" Acceleration Model

- 提供為期 12 個月涵蓋招募篩選、系統培訓、概念驗證及市場檢驗的服務

A 12-month program covering recruitment, selection, systematic training, proof-of-concept and market validation

對象 Target Applicants

1

已成立及登記的本澳公司，且股東、行政管機關成員和僱員不少於三人

Companies legally established and registered in Macao, with at least three shareholders, executive members, and employees in total.

2

有強烈成立公司意向的三人或以上之創業團隊

Entrepreneurial teams comprising three or more members with a demonstrated intention to establish a company.

項目發起人、核心技術團隊或股東須為澳大在職教師、職員、學生或畢業校友

The project initiator, core technical team, or shareholders must be current faculty members, staff, students, or alumni of the University of Macau.

品牌活動 BRAND ACTIVITIES

澳大極創客 The UltiMater

創新創業中心舉辦多元豐富的活動，將產業合作夥伴、投資人，創業導師等專業人士「請進來」。

2023 年 10 月，第二屆極創客以「生命科技」為主題，首次聯合澳門科技大學和澳門理工大學，與北京 12 所頂尖高等院校及醫院共同展出超過 70 項科技創新項目及初創公司。2024 年 11 月 8-9 日舉辦第三屆極創客，以「創新融合，輝映 1+4 多元發展」為主題凝聚澳門的創新創業力量，為澳門經濟適度多元化注入科技新活力。

CIE organizes a variety of activities to “BRING IN” industry partners, investors, start-up mentors and other professionals.

In October 2023, the 2nd UltiMater themed “Life Sciences & Technology”, collaborated with 12 Chinese top tier universities and hospitals, jointly showcased over 70 technological innovation projects and start-ups. In November 2024, the 3rd UltiMater was held with the theme “Innovation Integration, Diversified Development” aiming to inject new technological vitality into the diversification of the Macao's economy.

「中銀盃」極創客創業大賽 “BOC Trophy” UltiMater Entrepreneur Competition

2016–2023 年，澳大承辦「中銀盃」百萬獎金創業大賽澳門賽區，累計 446 支初創隊伍參加比賽。

2024 年開始，推出澳門大學「中銀杯」極創客創業大賽，深度銜接澳門大學科創培育的孵化體系。

CIE hosted the “BOC Trophy” One Million Dollar Macao Regional Entrepreneur Competition from 2016 to 2023, with a total of 446 start-up teams participated in the competition.

In 2024, CIE launched the first “BOC Trophy” UltiMater Entrepreneur Competition, to more deeply integrate the competition with University's incubation system.

2048 (澳門) 有限公司

2048 (MACAU), LIMITED

日日在野 WildDays，澳門首家精釀啤酒廠，成立於 2018 年。2021 年，成為澳門唯一一個精釀啤酒廠，地址位於：澳門激成工業大廈第二座十二樓 L 室。對很多人來說，酒廠位於一棟 12 層高樓的一個小小單位中，實在匪夷所思，這恰恰就是我們的品牌性格之一，NOTHING IS IMPOSSIBLE。

「釀造日復一日，在野積沙成塔」。堅持澳門本地釀造，將澳門多元的美麗文化 / 風景 / 事物釀入酒裡。路過鋼鐵的荒野，走在時間的荒野，日復日...我掙脫了日夜，成為了野孩子，赤腳奔跑，野蠻生長。我們什麼模樣，野都可以。我們一直是路上的野孩子，所見的花草，所聽的故事，皆是我們啤酒的靈感。原 [趣眼精釀 Funny Eye Brewing] 品牌進化，現以全新的名字 [日日在野 Wild-Days] 繼續我們的旅程。

WildDays, The SOLE craft beer brewery in MACAU, established since 2018. Brewing with each passing day, sands of time sculpts a tower in the wilderness. We, perpetual wanderers, imbibe the essence of flora and tales, transforming them into liquid inspiration.

Through barren steel we traverse, amidst the untamed wilderness of time, day by day... I shed the constraints of light and night, embracing my wild spirit, running barefoot, untamed in every way. Our visage, an epitome of untamed beauty, where wildness knows no bounds.

We must persist in pursuing our desires, speak against all that we find uninspired:

"None of Your Business, Cheers"

故事不死文化創意有限公司

ETERNAL STORY CULTURAL CREATIVITY, LTD.

核心優勢 Core Strength

- 一站式創意製作
 - 從概念、視覺到動畫與活動策劃，提供完整整合服務。
- 本地 IP 創作團隊
 - 澳門動漫玩協成員，擅長原創內容與角色開發。
- 跨領域製作能力
 - 涵蓋動畫、前端設計、產品設計與活動執行。
- 本地化專業團隊
 - 全澳門居民組成，熟悉本地文化與市場需求。

合作夥伴 Partners

故事不死文化創意有限公司成立於 2021 年，總部設於澳門，是一家具備跨領域整合能力的設計與多媒體創意公司。

我們專注於結合設計策略與視覺創作，提供涵蓋動畫設計、影片製作、動態影像設計、活動策劃與互動展示等專業服務，致力於為品牌與機構打造具影響力的創意內容。

團隊成員來自平面設計、動畫、電影與科技背景，擅長以動態影像說好故事，並透過高效率的製作流程與專業執行力，協助企業提升品牌形象、優化對外溝通。無論是品牌宣傳、活動影像、企業簡介影片或展覽互動裝置，我們皆以誠信與專業為本，提供高品質、具延展性的影像設計與創意整合服務，是澳門企業在面對設計與多媒體需求時值得信賴的合作夥伴。

ETERNAL STORY CULTURAL CREATIVITY, LTD. was established in 2021 and is headquartered in Macau. We are a design and multimedia creative company with the ability to integrate across various fields.

We focus on combining design strategy with visual creation, offering professional services in areas such as animation design, video production, motion graphic design, event planning, and interactive displays. We are committed to creating impactful creative content for brands and organizations.

Our team members come from backgrounds in graphic design, animation, film, and technology. We specialize in storytelling through dynamic visuals and, through efficient production processes and professional execution, assist businesses in enhancing their brand image and optimizing external communication.

Whether it's brand promotion, event videos, corporate profile films, or exhibition interactive installations, we base our work on integrity and professionalism. We provide high-quality, scalable visual design and creative integration services, making us a trusted partner for businesses in Macau facing design and multimedia needs.

澳門寵物紀元有限公司

BIOPETECH (MACAU) LIMITED

獲 FDCT 資助

澳門寵物紀元有限公司 (BioPeTech (Macau) Limited) 是一家寵物科技用品公司。公司始於 2021 年，源起於澳門大學科創團隊，研發的環保麥芽貓砂使用啤酒釀造過程中廢棄的麥芽渣作為主要植物纖維基底，以此研發出一款以環保、天然、健康為核心理念的高品質貓砂產品。本項目同時對接啤酒產業，為解決啤酒產業廢棄麥芽渣所帶來的環境問題與資源浪費提供解決思路，深入挖掘廢棄麥芽渣的潛在經濟價值與商機，形成循環經濟，提升整體社會經濟效益。同時，旗下的寵物科技產品品牌—十夕 DecaSol，旨在打造更多高科技、綠色、健康、對毛孩及家長友好的產品，守護每個毛孩家庭的健康與舒適。

BioPeTech (Macau) use the Brewer's spent grain by the beer industry as the plant fiber substrate, to develop a natural, environmentally friendly, cat litter product. This improves the defects of current plant cat litter, which are easy to deteriorate, breed bacteria. And provide solutions for the environmental problems caused by a large amount of malt waste in the beer industry. At the same time, it also provides cats with better quality cat litter and reduces the physical harm caused by cat litter.

We launched our pet technology product brand - DecaSol, aiming to create more high-tech, green, healthy, pets & parent-friendly products to protect the health and comfort of every pets family.

瀛盛廢品處理有限公司

YING SHING WASTE DISPOSAL LIMITED

獲 FDCT 資助

瀛盛廢品處理有限公司成立於 2024 年 7 月，當前定位是一家廢品回收及環保再生科技開發及應用公司。現作為澳瑞亞回收及環保科技有限公司的技術支持，聚焦於廢紙處理及再生工藝。

廢棄撲克牌處理與再生項目提出了一種基於澳門現狀的小型化處理再生工藝，以實現其中可再生資源的循環利用。撲克牌經過本工藝處理後將轉變為再生紙漿，可供紙張、紙漿模塑等再生產品使用。目前澳門市場中，僅存在兩家企業能夠環保處理澳門部分賭場的撲克牌，該市場仍需要一種高效處理且能夠實現 100% 回收的再生處理技術，而本項目的技術解決方案能夠滿足該要求。

YING SHING WASTE DISPOSAL LIMITED was established in July 2024 and currently positions itself as a waste recycling and environmental regeneration technology development and application company. Serving as the technical support arm of AUREA RECYCLING AND ENVIRONMENTAL PROTECTION TECHNOLOGY LIMITED, it focuses on waste paper processing and recycling technologies.

Poker Cards Recycling and Repurposing propose a miniaturized treatment, processing, and recycling process based on Macao's situation to achieve the recycling of renewable resources. After being processed by this solution, discarded paper will be transformed into recycled pulp, which can be used in the production of recycled products such as paper and pulp molding.

At present, in the Macao market, only two enterprises are capable of environmentally friendly processing of playing cards from some of the casinos in Macao. This market still requires an efficient processing technology capable of achieving 100% recycling, and the technical solution for this project meets that requirement.

核心優勢 Core Strength

- 廢紙處理技術支持

曜思機器人有限公司致力於將大型語言模型與自動化 AI 技術應用於製造業場景。公司旗艦產品 NexFactory 將工廠一線的非結構化知識轉化為 AI 可用的智能資產，從“維修”切入口持續構建工廠的核心智能能力，讓每一家工廠都擁有可進化的 AI 大腦。基於自研技術，NexFactory 能對現場圖片、視頻、語音與文檔進行自動清洗、結構化與知識提取，為工廠打造可持續進化的運維智能體。系統可協助企業加速設備故障排查、開展防範性維護、自動化沉澱運維知識，解決人員經驗差異大、技術斷層風險高、人力培養周期長等關鍵痛點。

目前，NexFactory 已在食品、包裝與半導體等行業的多家製造企業落地使用，包括廚邦醬油、加州 Golden Harvest Foods、SKG、富蘭克、訊芯電子等客戶，並在實際運行中展現出優秀的穩定性與數據安全性。項目已獲 2025 世界人工智能大會“Future Tech 100”稱號，以及創客中國澳門賽區冠軍等榮譽。

Cerebrite Robotics Limited is dedicated to applying large language models and automation-focused AI technologies to manufacturing scenarios. Its flagship product, NexFactory, transforms frontline, unstructured factory knowledge into AI-ready intelligent assets, building the core intelligence of a factory starting from equipment maintenance and enabling every factory to develop an ever-evolving AI brain.

Powered by proprietary technology, NexFactory automatically cleans, structures, and extracts knowledge from images, videos, voice notes, and documents generated on the shop floor, creating a continuously evolving maintenance intelligence agent for the factory. The system accelerates fault diagnosis, enables preventive maintenance, and automates the capture of operational know-how—addressing critical challenges such as inconsistent technician experience, knowledge loss, and long training cycles.

NexFactory is already deployed across manufacturers in the food, packaging, and semiconductor industries, including Chubang Condiment, Golden Harvest Foods (California), SKG, Francool, and Shunsin Technology. The system has demonstrated exceptional stability and data security in real-world operation. NexFactory has been recognized as a “Future Tech 100” project at the 2025 World Artificial Intelligence Conference and won the championship at the Maker in China Macau Regional Competition.

迪奇孚瑞生物科技有限公司

DIGIFLUIDIC BIOTECH LIMITED

獲 FDCT 資助

科技企業認證

Digifluidic 擁有國內首個成功量產的 EWOD 核酸檢測 POCT 平臺，Virus Hunter Plus 全自動核酸分析儀及數字微流控檢測晶片系列產品，將核酸檢測行業最為成熟的磁珠法核酸提取和熒光定量 PCR 檢測技術融合到晶片中，配合電潤濕法數字微流控技術，實現了便攜、高效、精準、自動化和低成本的體外診斷方案。公司核心技術源自澳門大學國家重點實驗室，研發團隊深耕數字微流控技術應用於分子生物學領域多年。澳門迪奇孚瑞生物科技有限公司於 2023 年榮獲經濟及科技發展局推出的《科技企業認證計劃》中的“潛力型科技企業”認證。

Digifluidic Bio-tech Co., Ltd (hereinafter referred to as “Digifluidic”) was founded in September 2018 as a Macau-funded enterprise. It is a key cultivation project in the Guangdong-Macao In-Depth Cooperation Zone in Hengqin and a model of industry-university-research collaboration between Macao and Hengqin.

The company brings together globally leading scientists, engineers, and innovators with strong scientific research backgrounds and extensive industry experience. Digifluidic is a high-tech innovation enterprise driven by molecular diagnostic technologies, centered on digital microfluidic technology (DMF), and focused on automated rapid disease detection. Its flagship product is an automated nucleic acid analysis system.

The facility includes clean production workshops and professional microfluidic laboratories. Digifluidic's core digital microfluidic technology was incubated in the State Key Laboratory of Analog and Mixed-Signal VLSI at the University of Macau. It stands as the first technology enterprise successfully incubated through technology transfer since the university's establishment and has obtained three U.S. patents.

澳門超科生物醫藥有限公司

MACAU SUPRASCIENCE BIOMEDICINE CO., LTD.

澳門超科生物醫藥科技有限公司專注於開發革命性細胞藥物遞送系統，用於多種疾病靶向治療，同時覆蓋大健康產品，包括膳食補充劑、美容養生產品等，為生物醫藥行業提供先進的技術和產品。

核心技術：首次提出「超分子細胞」的概念，利用快速、溫和的超分子技術構建工程化細胞，攜帶治療藥物，靶向病灶部位，細胞和藥物協同，實現 1+1>2 療效提升。

應用場景：超分子細胞藥物將患者自體的細胞與納米藥物進行結合，用於多種疾病治療，目前已經完成了缺血性腦卒中、動脈粥樣硬化、黑色素瘤等藥物在臨床前的研究。

獨特價值：超分子細胞藥物能夠在 1 天內完成製備，同時實現細胞治療費用的大幅降低，從而為患者提供安全有效、平價的細胞藥物。

Macau SupraScience Biomedicine Co., Ltd. is a technology platform company focusing on the development of revolutionary cell-based drug delivery systems for targeted therapy and also covering a wide range of health and wellness products.

Core Technology: Our team developed the world's first technology of "SupraCell" utilizing rapioand mild supramolecular technology to construct engineered cells that carry therapeuticdrugs to target lesion sites, achieve more effective outcomes.

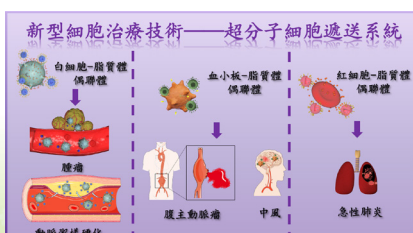

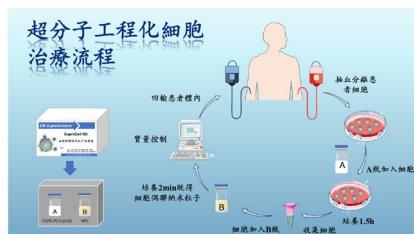

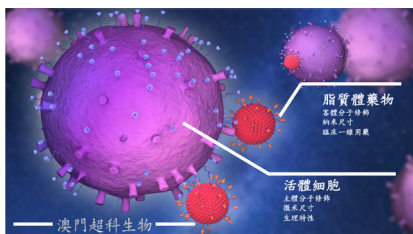

Application Scenarios: The SupraCell-based drug delivery technology using patients' own cells , could applicable to various diseases, preclinical studies have been completed for treatments of ischemic stroke, atherosclerosis and melanoma.

Unique Value: The SupraCell-based drugs can be prepared within one day while significantly reducing the cost of cell therapy, thereby providing patients with safe, effective, and affordable cell-based medications.

核心優勢 Core Strength

塵心健康科技有限公司

CHASING HEALTH TECHNOLOGY CO., LTD.

塵心健康科技有限公司致力於挖掘具有開發價值的民間秘方和醫藥古籍中的中草藥，並將傳統中草藥與現代技術有機結合，進軍國際天然藥物市場。「鳳鳴清」是公司打造的首個核心品牌，以滇藏杜英為主要成分開發針對急、慢性咽炎的系列產品，具有潤喉、抗炎的雙重功效。公司結合滇藏杜英天然療效與現代中醫藥研發科技，將這種寶貴的中草藥帶出了深山。本公司秉持著宣傳中醫藥的使命，依託粵澳合作中醫藥產業發展，把握國家振興中醫藥的機遇，促進中醫藥創新研發、成果孵化與轉化。

Chasing Health Technology Co., Ltd. is dedicated to exploring valuable folk prescriptions and Chinese traditional herbal medicines found in ancient medical texts with potential for development. By synergizing traditional herbal remedies with modern technology, the company is entering into the international natural medicine market. Feng Ming Qing, the first core brand of our company, are developed for acute and chronic pharyngitis with *Elaeocarpus braceanus* as the main ingredient. It has dual effects of moisturizing the throat and anti-inflammation. We integrate the natural healing properties of *Elaeocarpus braceanus* and the research and development technology of modern Chinese medicine, and brings this invaluable natural remedy from the mountains to the forefront of consumer wellness. The company upholds the mission of promoting traditional Chinese medicine (TCM), leverages the development of Guangdong-Macao cooperation in the TCM industry, grasps the opportunity of the country's revitalization of TCM, nurtures breakthrough achievements, and facilitating transformations.

鳳鳴清

滇藏杜英清咽系列產品

桐花萬里丹山路，雛鳳清於老鳳聲

鳳鳴清潤喉系列產品

——具有中藥成分的潤喉護功能型產品

核心成分：

滇藏杜英 *Elaeocarpus braceanus*

傣族音譯“咳哩佬”、“克地佬”

- 具有云南地方民族風味的可食用野果，有長久的食用歷史。
- 綠色天然，產自滇西高黎貢山無污染區域。
- 富含多種化合物，包括生物鹼和萜類化合物等。
- 作為傳統藥物用於治療咽炎，適用於心悸、肝病、糖尿病和瘧疾。

東方香韻飄世界 中醫香療愈全球 共啟千億賽道 同鑄健康價值

合安香療公司於 2024 年 1 月正式進駐創新創業中心，專注於中醫香療的傳承與創新。依託澳門大學健康科學學院及中藥機製與質量全國重點實驗室科研支撐，我們針對神經、消化、免疫、呼吸系統構建了多元產品矩陣，既為現代年輕人提供預防保健方案，亦為慢性病患者及老年人打造症狀緩解與生活質量提升的中醫香療產品。我們通過 "中醫香療 +X" 的模式，積極推廣中醫香療文化，提倡未病先防的健康生活理念。我們的業務板塊分為三部分：產品研發，臨床輔助治療應用推廣，以及中醫香療文化體驗。

Macau Hap On Aromatherapy Application Research Institute Co., LTD. focuses on the inheritance and innovation of Traditional Chinese Medicine (TCM) aromatherapy. Relying on the Faculty of Health Sciences and the State Key Laboratory of Mechanism and Quality of Chinese Medicine of UM, Hap On are not only committed to providing TCM aromatherapy products and preventive health care solutions for young people, but also creating TCM aromatherapy products for chronic disease patients and the elderly to relieve symptoms and improve their quality of life. In manner of "TCM aromatherapy+X", Hap On actively promote the culture of TCM aromatherapy and advocate the concept of healthy lifestyle "preventing illness before it occurs". Our business segments are divided into three parts: product research and development, clinical adjuvant therapy application and promotion, and TCIM aromatherapy cultural experience.

本公司專注於開發以 TNFR2 為靶點的單域抗體（Nanobody），用於提升實體腫瘤的免疫治療效果，特別是對現有 PD-1/PD-L1 療法反應不佳或產生耐藥的患者。公司以自有原創技術為基礎，結合 CRO 與 GMP 生產體系，推進候選藥物的臨床前與臨床轉化，並同步布局診斷試劑及技術授權，面向中國與國際腫瘤免疫市場。

The company focuses on developing TNFR2-targeting single-domain antibody (nanobody) therapeutics to enhance cancer immunotherapy, especially for solid-tumor patients who show low response or resistance to current PD-1/PD-L1 treatments. Leveraging its proprietary science and partnerships for CRO and GMP manufacture, the company advances its candidates toward clinical application while exploring companion diagnostics and licensing opportunities for China and global oncology markets.

服務
Service

- 個性化護膚定制服務
- 提供一站式中藥多糖活性原料
- 微生物功效評價服務

明微生物是一家專注於「中藥多糖—人體微生態」互作研究與轉化應用的科技初創企業，核心業務涵蓋基於中藥多糖與皮膚微生態互作的创新型護膚產品開發，以及針對濕疹、特應性皮炎、痤瘡、銀屑病等皮膚疾病的外用中成藥研發。作為澳門首個以中藥多糖為核心的護膚品牌，公司已建立多元化產品管綫，包括多糖面膜、多糖凝膠、多糖精華液、多糖護手霜、多糖唇膏、多糖防曬霜、多糖頭皮護理液及多糖生髮防脫洗髮水等系列。同時，公司透過自主開發的培養組學技術與人工智慧菌群數據庫，為用戶提供個性化、具臨床價值的精準護膚產品與護理方案。此外，公司擁有自主研发的「中藥／中藥多糖／小分子—皮膚／腸道／呼吸道／生殖道菌群」互作共培養技術平臺，可快速精準鑑定潛在藥用分子與微生物靶點，為中藥企業提供技術服務，現已支援包括國藥一方製藥在內的多家大型企業進行中藥大健康產品研發。

MM BIOTECH is a technology start-up focused on the interaction between TCM polysaccharides and the human microbiome. We develop innovative skincare products based on polysaccharide-skin microbiome modulation and topical TCM formulations for eczema, atopic dermatitis, acne, and psoriasis. As Macau's first polysaccharide-centered skincare brand, we offer a diverse product pipeline including masks, gels, serums, hand creams, lip balms, sunscreens, scalp care solutions, and anti-hair-loss shampoos. Using our proprietary skin microbiome culturomics technology and AI-based microbial database, we provide personalized and clinically meaningful precision skincare solutions. Our in-house co-culture platform for TCM/polysaccharides/small molecules-skin/gut/respiratory/reproductive tract microbiome also supports rapid identification of active compounds and microbial targets, enabling CRO services for major partners such as EFONG Pharmaceutical (Sinopharm).

麥肯原科技有限公司

MACORIGEN TECHNOLOGY LIMITED

 獲 FDCT 資助

在幹細胞的研究與轉化的過程中，對動物血清和人血小板裂解物等成分不明的添加物的依賴，已成嚴峻的挑戰。這些傳統的培養體系批次間差大，結果可重複性差，並伴有潛在的安全風險，極大地限制了幹細胞研究的標準化，也影響了細胞治療的臨床轉化可行性。因此，若要推動再生醫學和細胞治療的發展，必須從源頭改善細胞培養的基礎條件。

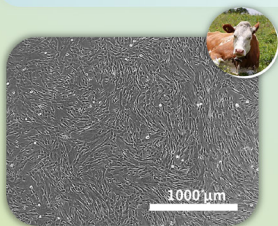

基於這一認識，我們創立了麥肯原科技有限公司，專注於開發化學成分明確，品質穩定，可靠且符合實驗室與臨床標準的細胞培養平臺，以支持幹細胞研究的進步與成果的有效轉化。我們的 Mesne Definite 系列培養基是專門為間充質幹細胞設計的培養平臺。三款配方皆為無血清、無動物源、化學成分明確的，涵蓋細胞提取擴增、機制研究及表徵驗證等關鍵階段，為科研人員提供高一致性，高可控性及高穩定性的解方案，助力基礎研究到臨床轉化的每一步。

In the course of stem cell research and translation, the heavy reliance on undefined products including animal sera and human platelet lysates has become a significant challenge. These traditional culture systems suffer from severe batch-to-batch variability, poor reproducibility, and potential safety concerns, which collectively hinder the standardisation and clinical translation of cell-based innovative medicine. To facilitate progress in regenerative medicine and cell therapy, it is essential to improve the foundational pillar-culture systems. Therefore, we founded MacOrigen Technology and dedicated to developing chemically defined, robust, and reliable stem cell culture platforms that meet both laboratory and clinical standards, and to supporting stem cell innovations and the effective translation of the outcomes. Our Mesen Definite series is chemically defined and serum-free media tailored for mesenchymal stem cells. Formulations were optimized for derivation, expansion, mechanistic studies, and characterization, to empower researchers with consistency, control, and stability across the entire MSC workflow-from bench to hospital bed.

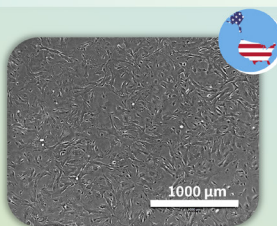

核心技術 Core Technology

- 化學成分明確的培養技術
- 功能細胞定向分化
- 細胞功能調控與優化
- 細胞高效擴增與品質控制

澳門海思泌生物科技有限公司

MACAU HEALTHEXO BIOTECHNOLOGY LTD.

澳門海思泌生物科技有限公司是聚焦幹細胞外泌體技術轉化的創新型企業。公司依託澳門大學與廣州醫科大學附屬第五醫院的科研及臨床資源，整合大灣區優勢，專注幹細胞外泌體系列產品的研發、生產與產業化。目前公司已構建多元產品管線，包括美妝領域（外泌體面膜、精華、乳液）；醫療健康領域（幹細胞外泌體敷料）和技術工具領域（外泌體提取試劑盒）。公司已累計申請專利 13 項（11 項授權、2 項實質審查），外泌體化妝品原料已完成國際 INCI 備案，澳門地區相關備案有序推進，為市場化奠定基礎。

Founded in 2024, MACAU HEALTHEXO BIOTECHNOLOGY LTD. is an innovation-driven company focused on translating stem-cell exosome technology. Leveraging research and clinical resources from the University of Macau and the Fifth Affiliated Hospital of Guangzhou Medical University, and integrating the strengths of the Greater Bay Area, the company is devoted to the R&D, production and industrialization of stem-cell exosome products. Its diversified pipeline spans beauty (exosome masks, serums, lotions), medical care (stem-cell exosome dressings) and research tools (exosome isolation kits). To date, it has filed 13 patents (11 granted, 2 under substantive examination), completed international INCI filing for exosome cosmetic ingredients, and is advancing related registrations in Macao—laying a solid foundation for market launch.

告別宿醉困擾，重拾清爽活力——翌日清，您的專屬護肝醒酒專家

是否曾在歡聚暢飲後，深受頭痛、乏力等“隔夜醉”的困擾？是否擔心推杯換盞間，酒精悄悄損傷著您的肝臟與腸胃？

翌日清，以甄選枳椇子、葛根、山楂、白扁豆花、茯苓等藥食同源原料，運用現代工藝科學配比。每一袋翌日清，都凝聚了自然的護佑之力：

- 加速代謝，快速醒
- 緩解宿醉，煥發活力
- 守護肝健康，防患於未然
- 調理腸胃，恢復平衡

選擇翌日清，選擇清醒與健康，讓每一次歡聚都無後顧之憂！

科學研究依據：

預先口服翌日清，可顯著降低醉酒率，醒酒時間顯著縮短（表 1）；血清中谷丙轉氨酶（ALT）、穀草轉氨酶（AST）的水平顯著降低（圖 1）；肝細胞損傷情況改善（圖 2）。翌日清所含成分具有解酒護肝作用^[1-4]。

組別	醉酒率/%	醉酒時間/min	醒酒時間/min
模型對照組	88.89%	12.375±6.61	182.125±46.25
處理組（翌日清）	33.33%*	12.67±4.04	48±20.07*
陽性組（海王金梅）	77.78%	16.86±10.17	113.57±65.26

仁人藥業健康科技有限公司

RENREN PHARMACEUTICAL HEALTH TECHNOLOGY COMPANY LIMITED

仁人藥業以「科研驅動、標準引領、平台賦能、國際轉化」為綱，依託澳門國際化政策與中藥檢測優勢，搭建覆蓋標準檢測、研發轉化、臨床前驗證、製造註冊、品牌出海的全鏈條平台，打造「澳門標準·中國智慧·國際市場」樣板。公司採用「企業研發+聯合實驗室+頂尖機構」模式，與澳門大學、中科院藥植所、上海交大氫科學中心合作，實現從原料道地性鑒定、活性與機制研究到標準建立與安全性驗證的閉環，兼容國際法規。與珠海澳大科技研究院共建 ZUMRI-AumHealth 聯合實驗室，聚焦藥食同源與民族藥，圍繞龍血竭、天麻、黃精推進「原料—製劑—標準一體化」與工藝放大。公司配備 HPLC/GC/LC-MS/MS、ICP-MS、多指標定量與指紋圖譜、細胞與毒理評估及 LIMS/ELN+SOP 體系，確保數據可追溯。已形成以民族藥與藥食同源為核心的產品矩陣：龍血竭+HydroMg 心血管系列、天麻黃精酥、NMN+PQQ、金膽解酒護肝等，作為技術展示與產業化模板。

Renren Pharmaceutical Health Technology pursues a strategy of "research-driven, standards-led, platform-enabled, and internationally translated" growth. Leveraging Macau's policy advantages and certified TCM testing ecosystem, we operate an end-to-end platform spanning standards/testing, R&D translation, preclinical validation, manufacturing/registration, and global branding. Our tri-pillar model—enterprise R&D + joint laboratories + leading institutes—includes long-term collaboration with the University of Macau (SKLQ; Faculty of Health Sciences), Shanghai Jiao Tong University's Hydrogen Science Center (Prof. Ding Wenjiang), and IMPLAD (Chinese Academy of Medical Sciences). The ZUMRI-AumHealth Joint Laboratory serves as a translational hub integrating raw materials—formulation—standards, focused on Resina Draconis, Gastrodia, and Polygonatum. We maintain advanced analytics (HPLC, GC, LC-MS/MS, ICP-MS), multi-marker quantification/fingerprints, cell and toxicology assays, and LIMS/ELN with SOPs for full traceability. Our product matrix validates the platform: Resina Draconis + HydroMg cardiovascular series, Gastrodia-Polygonatum functional bakery, NMN+PQQ anti-aging, and Jindan hangover-liver support capsules.

中科互聯有限公司 ZHONGKE HULIAN CO., LTD.

中科互聯有限公司定位生物材料公司，依託澳門大學的前沿研發力量，緊跟大灣區政府 1+4 發展政策。公司專注於高端美容科技和人工皮膚無疤痕傷口修復技術，致力於為醫療設施提供高度仿生的**人工皮膚**，攻克無疤痕創傷修復的難題。公司理念是“**科技賦能修護，匠心呵護肌膚與創口**”。公司在技術創新方面取得了顯著突破，特別是在**水凝膠面膜及敷料**的研發上，目前已授權相關專利並發表 SCI 論文。採用**碳點交聯技術**，將荷葉提取物與天然蛋清精華結合，形成有序的網狀凝膠結構，提升產品在**保濕、舒緩、無疤痕修復皮膚**方面的效果。面膜 / 敷料市場需求高漲，消費者對功效的訴求愈發多元化。公司產品順應天然、有機潮流，以蛋清精華蛋白成分修復、中草藥成分添加為主要特點，切入面膜 / 敷料市場，吸引並擴大科學護膚修復人群。

Zhongke Hulian Co., Ltd. is a biomaterials company leveraging the research strengths of the University of Macau and aligning with the Greater Bay Area's "1+4" development strategy. The company focuses on advanced cosmetic technologies and scar-free wound repair using artificial skin, aiming to deliver highly biomimetic solutions for medical applications. Its mission is: *"Technology empowers restoration; craftsmanship protects skin and wounds."*

The company has achieved notable innovations in hydrogel-based facial masks and wound dressings, supported by authorized patents and SCI publications. Using carbon-dot crosslinking, lotus leaf extract and natural egg-white proteins are combined to form an ordered hydrogel network, improving hydration, soothing, and scar-free skin repair.

With rising demand for masks and dressings and growing interest in natural, organic products, Zhongke Interconnect offers formulations featuring egg-white proteins and traditional herbal ingredients, targeting the scientific skincare and wound-healing market.

核心技術 Core Technology

- 中藥碳點提取技術
- 碳點交聯技術
- 無疤痕修復技術

智劑人工智能科技有限公司

FORMULAI ARTIFICIAL INTELLIGENCE TECHNOLOGY LIMITED

智劑科技是全球首家整合人工智慧 (AI)、分子動力學模擬 (MD) 和生理藥代動力學模型 (PBPK) 的計算藥劑公司，致力於革新傳統藥物製劑研發模式。傳統製劑開發依賴經驗試錯，面臨成本高、週期長、成功率低的行業痛點，而智劑科技通過 AI 驅動的智能配方設計、高精度分子模擬和跨物種藥效預測，實現從實驗室到臨床的全流程計算輔助，將製劑研發效率提升數倍以上，顯著降低研發成本與失敗風險。目前公司已覆蓋小分子、核酸藥物和複雜遞送系統，服務全球多家餘家藥企與科研機構，成為 AI 製藥領域在製劑優化環節的標杆解決方案。

FORMULAI is the world's first computational pharmaceuticals company to integrate artificial intelligence (AI), molecular dynamics (MD) simulations, and physiologically based pharmacokinetic (PBPK) modeling, dedicated to reinventing the traditional drug formulation R&D paradigm. Conventional formulation development relies on trial-and-error, facing high costs, long timelines, and low success rates. By combining AI-driven intelligent formulation design, high-precision molecular simulations, and cross-species efficacy prediction, FORMULAI enables end-to-end computational assistance from lab to clinic, boosting development efficiency by several folds while significantly reducing costs and failure risk. The company's platform now spans small molecules, nucleic acid therapeutics, and complex delivery systems, serving numerous pharmaceutical companies and research institutions worldwide, and has become a benchmark solution in AI-enabled formulation optimization.

技術方案

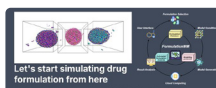

人工智能 + 分子模擬 + 生理藥動學模擬 = 最優藥物處方

藥物製劑人工智能

- 建立全世界第一個藥物製劑人工智能平台（超過一萬條處方數據）；
- 開發了專門適用於藥物製劑的機器學習算法

藥物分子模擬技術

- 構建藥物與輔料的結構數據庫，搭建第一個製劑模擬系統；
- 計算藥物與輔料分子間相互作用及相關參數；

藥物動力學模擬

- 全面融合藥物的動物模擬、健康人群和患者的數據；
- 預測製劑體內藥動學行為，建立製劑體內外相關性；

環宙（澳門）生物科技有限公司

GLOBALONCO (MACAU) BIOTECHNOLOGY CO., LTD.

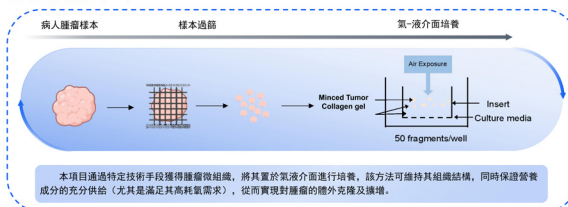

環宙（澳門）生物科技有限公司聚焦於兩大核心業務，致力於推動腫瘤精準治療的發展。公司依托澳門大學健康學院鄧初夏院長團隊多年的腫瘤研究成果，為晚期腫瘤患者提供個性化用藥指導。通過微腫瘤（MTC）與 3D 腫瘤切片（3D-TSC）等技術，我們能夠在一周內完成體外腫瘤模型構建與藥敏測試，為臨床用藥提供科學依據。

同時，團隊通過靶向最新自主發現的抗藥機製 -- 蛋白酶體，開發針對腫瘤多藥耐藥的抗體偶聯藥物（ADC），旨在突破現有治療的耐藥瓶頸，為對傳統治療無效的患者提供新的治療選擇。兩大業務協同並進，共同服務於腫瘤精準醫療的創新與應用。

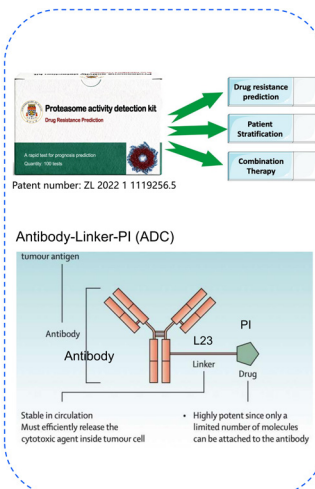

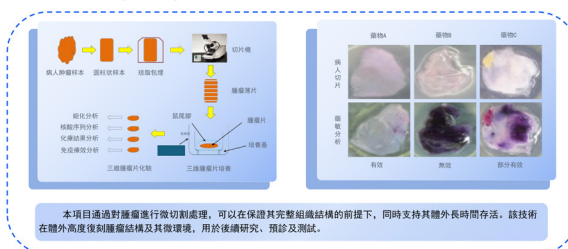

GlobalOnco (Macau) Biotechnology Co. Ltd. focuses on two core business areas dedicated to advancing precision oncology therapeutics. Leveraging decades of cancer research from the team of Prof. Chuxia Deng, Dean of the Faculty of Health Sciences at the University of Macau, the company provides personalized medication guidance for patients with advanced cancer. Utilizing technologies such as Miniaturized-Tumor Culture (MTC) and 3D Tumor Slice Culture (3D-TSC), we can complete in vitro tumor model construction and drug sensitivity testing within one week, offering scientific support for clinical medication decisions.

Concurrently, the team is developing antibody-drug conjugates (ADCs) targeting tumor multidrug resistance by focusing on a novel self-identified resistance mechanism—the proteasome. This approach aims to overcome the limitations of existing treatments affected by drug resistance, providing new therapeutic options for patients who do not respond to conventional therapies. These two business segments operate synergistically, collectively driving innovation and application in the field of precision oncology.

HYDROMG

澳門氫美健康科技有限公司 MACAO HYMG HEALTH TECHNOLOGY CO., LTD.

澳門氫美健康科技有限公司是由上海交通大學氫科學中心與澳門大學聯合孵化的健康科技企業。公司依託丁文江院士團隊 28 年科研沉澱的「醫藥級微納鎂基固態儲氫技術」（源自國家技術發明獎一等獎成果），為人們提供高品質的抗衰老健康產品。我們秉持著「科技賦能健康創新引領未來」的理念，匯聚頂尖科研人才，不斷探索氫鎂領域的無限可能，為人類健康事業貢獻力量。

我們已研發核心抗衰產品「HydroMg 每年輕本源抗衰老膠囊」，活性成分明確，可靶向遞送負氫離子至線粒體，清理自由基、促進 ATP 合成，有效維持線粒體正常功能及細胞年輕特性。相較於 NMN 等傳統抗衰成分，其在功效針對性與作用穩定性上更具優勢，能更精準助力抗衰需求。

MACAO HYMG HEALTH TECHNOLOGY CO., LTD. is a health technology company jointly incubated by the Hydrogen Science Center of Shanghai Jiao Tong University and the University of Macau.

Backed by 28 years of scientific research from the team led by Academician Ding Wenjiang — the "pharmaceutical-grade micro-nano magnesium-based solid-state hydrogen storage technology", which is derived from the achievement of the National First Prize for Technological Invention — the company provides people with high-quality anti-aging health products.

Upholding the concept of "Empowering Health with Technology, Leading the Future through Innovation", it gathers top scientific research talents, continuously explores the infinite possibilities in the field of hydrogen and magnesium, and contributes to the cause of human health.

We have developed our core anti-aging product, "HydroMg Annual Youth Source Anti-Aging Capsule", with clear active ingredients. It can target and deliver negative hydrogen ions to mitochondria, scavenge free radicals, promote ATP synthesis, and effectively maintain the normal function of mitochondria and the youthful characteristics of cells. Compared with traditional anti-aging ingredients such as NMN, it has greater advantages in efficacy targeting and action stability, and can more accurately meet anti-aging needs.

澳門升方健康科技有限公司

MACAU SHENGFANG PHARMACEUTICAL TECHNOLOGY CO., LTD.

專注於經典名方多元化產品的研發和註冊，針對中藥產品及經典名方進行功效 / 配方篩選及工藝研究等，致力於創造出高品質、有效的經典名方產品。我們將建立專注於經典名方研究與科技轉化的先進企業，目標是圍繞中藥經典名方的研究，形成服務於粵港澳大灣區的中藥經典名方的開發模式和產業轉化能力。

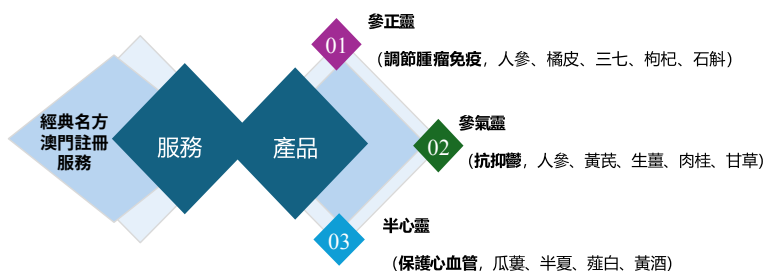

- ◆ Focus on the R & D and registration of diversified products from classic prescriptions
- ◆ Conduct efficacy/formula screening and process research on TCM products and classic prescriptions
- ◆ Create high - quality and effective products from classic prescriptions
